

Tips and Tricks

Installation on Mac OS

1. Open the terminal in your Mac machine
2. Install Homebrew as suggested in the link - <https://github.com/Homebrew/homebrew/wiki/Installation>
3. After Homebrew is installed, type in "brew install riak" in the terminal.
4. Complete the installation as suggested in the link - <http://docs.basho.com/riak/latest/ops/building/installing/mac-osx/>

Note: Ensure the compiler is set to GCC. Follow the below link for reference:

<http://apple.stackexchange.com/questions/99077/how-to-set-gcc-4-8-as-default-gcc-compiler>

Installation on Ubuntu OS

1. <http://docs.basho.com/riak/latest/ops/building/installing/debian-ubuntu/#Installing-From-Source>
